I am a recent graduate of Petra Christian University, majoring in Business Information Systems, with a strong academic foundation in programming and software development. During my studies, I completed several practical projects and developed skills in multiple programming languages. I also gained real-world experience through internships as a Back-end Developer and Android Developer, where I contributed to system development in a structured team environment. I am eager to continue growing professionally, bringing a strong work ethic, willingness to learn, and a commitment to delivering high-quality results in every task assigned.

Work Experiences

PT. Performa Inti Nusantara - **Surabaya, Jawa Timur**   Dec 2024 - Mar 2025
Android Developer - Internship [Certificate]

- Successfully developed and integrated a mobile payment system, leading to noticeably faster transactions and better user experience compared to the company's previous web-based process.
- Built and enhanced 10 critical app features within a 4-month internship using React Native, covering user role logic, KTP-based registration, family account linkage, payment integration with Midtrans, and accessibility-focused UI/UX update.
- All features were API-integrated, and new updates or bug fixes were deployed using Git collaboratively with the development team.
- Designed over 5 wireframes and mockups using Figma for various new features, ensuring alignment with the company's UI standards and improving internal user satisfaction.
- Conducted testing on more than 20 application functions, identifying and resolving over 10 critical bugs that could cause crashes or input errors.

PT. Cross Network Indonesia - **Surabaya, Jawa Timur**   Jul 2023 - Dec 2023
Back-end Developer - Internship

- Designed and implemented more than 10 RESTful API endpoints using Go (Golang) with the Echo framework and MySQL, supporting both internal systems and client-based projects.
- Collaborated to present system architecture and design to 4 team members, which led to improved backend efficiency and a more optimized API response flow during internal testing.
- Performed more than 20 manual and integration tests using Postman to validate endpoint functionality and ensure critical bugs were resolved before deployment.
- Provided technical feedback and peer support to fellow interns, accelerating their project understanding and contributing to consistent code quality within the team.

Education Level

Petra Christian University - **Surabaya, Jawa Timur**   Aug 2020 - Sep 2024
Bachelor of Business Information System, 3.02/4.00 [Transcript]

Notable Projects:

- Devouring Frenzy : A 2D desktop game inspired by Feeding Frenzy, built using Java and Object-Oriented Programming (OOP) principles. Designed to demonstrate understanding of class structures, inheritance, and polymorphism in Java. [Preview]
- Website Hotel : A hotel room reservation system designed as a desktop application using JavaFX and Scene Builder. This project showcases interface design without manual HTML coding and includes features like room selection, customer data input, and simple booking confirmation logic.
- EZ Cook : A modern cooking recipe website interface designed using Figma to visualize user flow and screen layout. Focused on intuitive design for users to browse, save, and follow cooking instructions, simulating front-end planning and UX design process. [Preview]

Another Projects

Landing Page Dafco Resource
Tech : Figma [View All Portofolio]

- Designed a visual identity for Dafco Resource's landing page by integrating consistent brand colors, iconography, and layout spacing to reinforce professionalism and trust.
- Created 7 structured content sections based on user flow analysis, increasing clarity and ease of navigation for first-time visitors.
- Integrated palm leaf illustrations and coconut imagery to maintain thematic consistency and strengthen product identity.

UI/UX Every Nation
Tech : Figma

- Designed a complete web-based platform interface using Figma for a church community engagement system, including dashboard, event management, discipleship classes, and attendance monitoring.
- Worked closely with developers to ensure that the design translated effectively into working features, not just visual improvements.
- Created high-fidelity mockups for over 10 screens, ensuring responsive layout, intuitive navigation, and consistent component design.
- Focused on user journey clarity and interface accessibility to accommodate users of various age groups and digital literacy levels.

Organisational Experience

Tim Petra Sinergi - **Surabaya, Jawa Timur**   Jul 2021 - Dec 2021
Member of Life Enrichment

- Guided students in understanding university life, including the challenges and opportunities they may encounter.
- Provided comprehensive materials and preparation to help students approach their studies with greater confidence.
- Shared up-to-date information regarding developments in academic life.
- Facilitated sharing sessions in a private and supportive environment, allowing individuals to find personal solutions and foster openness and solidarity among fellow students).

SPEKTRAKULER - SEMINAR BIM 2021 - **Surabaya, Jawa Timur**   Oct 2020 - May 2021
Staff of HIMA SEKRETARIAT DAN PUBLIC RELATIONS

- Assisted in compiling financial data for the Spetrakuler event and securing sponsors to support its execution.
- Reviewed sponsorship reports with all team members involved in the event.
- Delivered a pre-event briefing on rules and assigned responsibilities for event implementation.

Certification

- Beginner Back-End Development with JavaScript by Dicoding | May 2025 [Certificate]
- Introduction to Data Science by Dicoding | January 2024 [Certificate]
- Fundamentals of Structured Query Language (SQL) by Dicoding | December 2023 [Certificate]
- Introduction to Project Management by Dicoding | December 2023 [Certificate]
- JavaScript Programming Basics by Dicoding | May 2023 [Certificate]
- Cloud Practitioner Essentials by Dicoding | April 2023 [Certificate]
- IT Support Google Professional by Coursera | January 2023 [Certificate]

Skills

- Soft Skills : Public Speaking, Problem Solving, Attention to Detail, Teamwork, Strong Communication and Analytical Thinking.
- Hard Skills : Programming Languages: (Go, JavaScript, PHP, MySQL), Frameworks: (Laravel, React, React Native), Design Tools: (Figma).
